## Product Overview

The TransTel AH-99IP Hotel SIP VoIP Phone is ideally suited for both Hotel, Hospitality and Business applications. The AH-99IP features 10 programmable memory keys that can be custom configured for services in Lodging Applications like Operator, Front Desk, Concierge, Voice Mail and a variety of other services. In Business Applications these keys can represent access to features or they may store frequently dialed telephone numbers.

The additional advantage to the TransTel AH-99IP phone is its ability to receive a PAGE (broadcast) when connected to the TransTel Hybrid IP Telephone System! This capability allows customers to utilize cost effective phone sets instead of using more expensive broadcast / paging systems and still be able to announce important messages on a system wide basis.

For example, a Hotel, School or Nursing Home Administrator can initiate an All Call Page to announce an emergency evacuation. By utilizing the TransTel AH-99IP Phone, ALL guest rooms, classrooms and nursing home residents will hear the evacuation announcement. This drastically improves response times and effectiveness while saving costs at the same time.

The TransTel AH-99IP is an easy-to-operate and affordable SIP VoIP Phone. It features handsfree capability, message waiting indication and is wall mountable too.

## Specifications

- 5 Function Keys
- 10 One-Touch Dial Memory Keys
- Ringer Volume: 8 levels
- Ringer (Downloadable): 12
- Available in Desktop and Wall-Mount
- Ethernet 10/100/1000M Based-Tx Auto Sense Port: 2 ports
