Section 4 System Requirements

Pentium 400 MHz CPU or above

Windows98se/XP/2000/NT OS

10MB HDD or above

128 MB RAM or above

CD-ROM Driver

LAN, ADSL, ISDN, 33.6K network

Standard USB port

Standard RJ11 Jack

Support USB2.0 Full Speed

Support USB Audio Device Class Specification 1.0

Supports Microsoft Windows98se/ ME / 2000/ XP

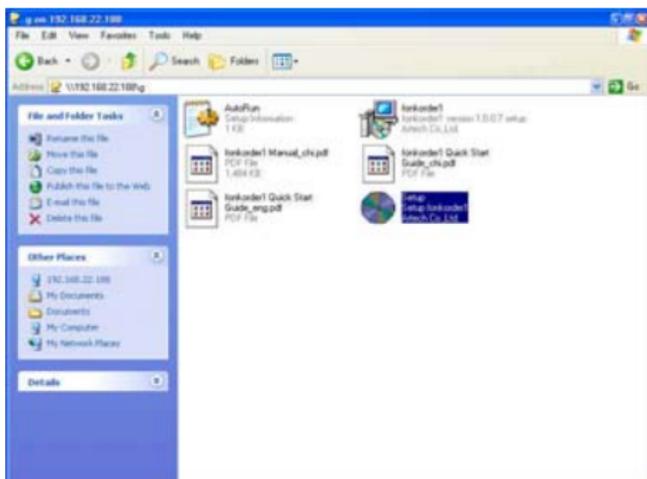

Operating Temp 0oC - 50oC (32oF - 122oF)

Storage Temp -30oC - 65oC (-22oF - 149oF)

Operating humidity 10% - 90% without congealment

Section 5 Install fonkorder1 USB Recorder and Application

Insert CD driver to find out [Setup.exe] to start installation.

Install fonkorder 1 Application
Fonkorder 1 User's Manual
Fonkorder 1 Quick Install Guide

- Check CD Contents
- Download latest fonkorder 1 application
- Link to artech voice trigger official website
- Install Adobe Acrobat Reader first before reading PDF file, you can download latest Acrobat Reader from Adobe website

Exit

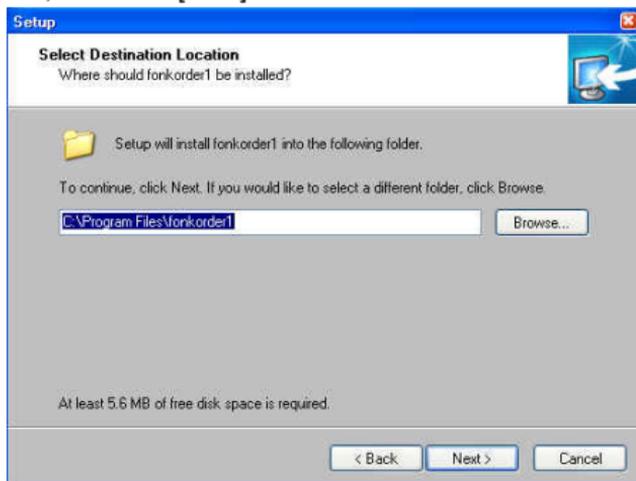

Click [Install fonkorder1 Application] will pop up below window:
This is the language selection interface for installing.
Click [OK] to continue, click [Cancel] to exit installation.

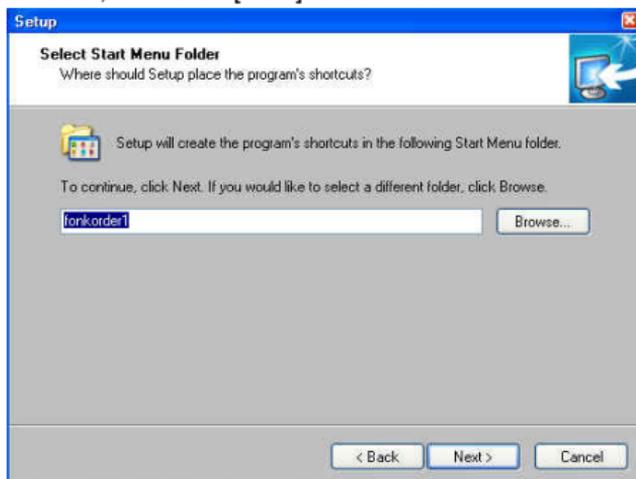

After clicking [OK] will pop up below window to click [Next] to continue.

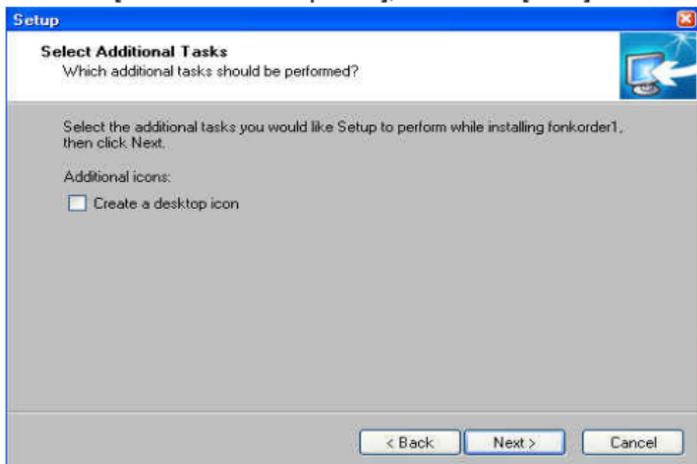

Then will pop up a window to remind you select forkorder1 installing location, click [Browse] can change scheduled path, we suggest use default path, then click [Next] to continue.

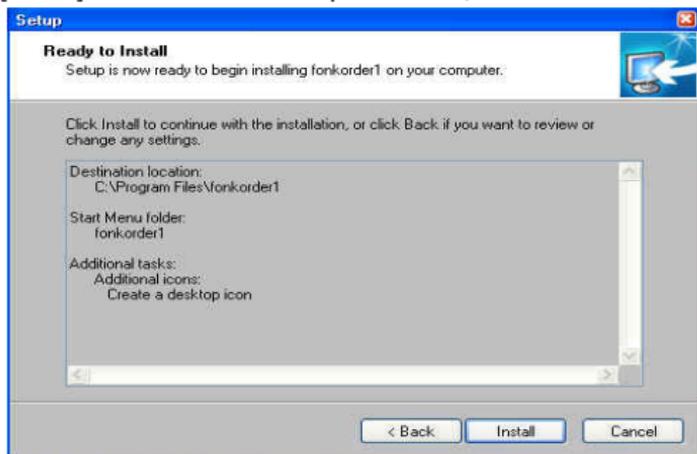

Then will pop up a window to remind you select start menu folder on start program, click [Browse] can change folder name, suggest use the scheduled folder, then click [Next] to continue.

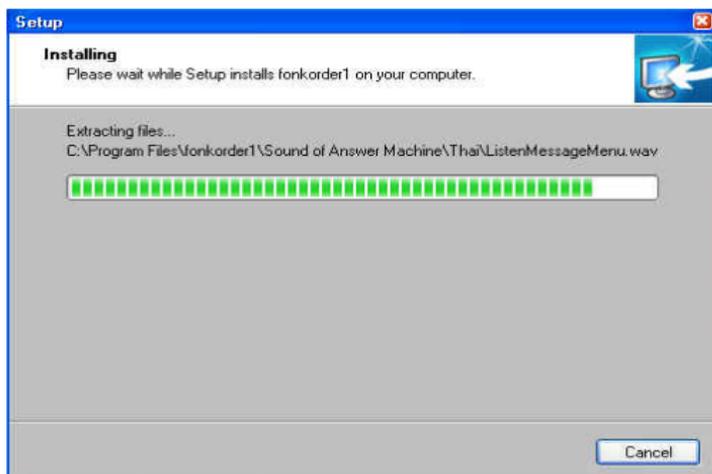

You can select [Create a desktop icon], then click [Next] to continue.

Click [Install] to confirm all above procedures, then will start installation.

Then will display installing progress list, click [Cancel] to cancel installation.

After progress reached 100% stands installing is done, then click [Finish] to end fonkorder1 application installation.

Then will pop up a window for login application, if hardware is connected ready, the default username is Admin, Password is [1111], click [Login] will login application immediately. If the hardware is not ready yet, please install it as per below procedures.

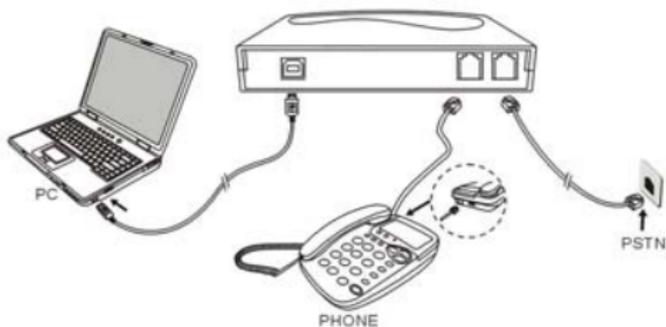

5.1. Install USB Recorder Hardware

4 units of fonkorder1 can be installed to one PC at one time, the device ID must be selected via the back switch behind device, so if multiple fonkorder1 are used, please slide the switch to different position to distinguish different device ID, else will detect the same device if the switch at the same position.

5.2 Install Procedures

1. Connect RJ-11 phone port to Phone Jack of device, connect RJ-11 line port to Line Jack of device;
2. Connect another RJ-11 phone port to Telephone set, connect another RJ-11 line port to PSTN or C.O. line;
3. Connect USB port to USB Jack of device, connect another USB terminal to PC or laptop.

If connecting is success, PC will remind [Found New Hardware], please wait a moment, system will continue auto detecting:

Then will pop up below window, please select [Install the software automatically], click [Next] to continue.

System will remind USB Audio device is searching as shown in below, please wait some time.

After the device is recognized success, system will pop up below window to remind new device is already installed and ready to use, click [Finish] to end hardware installation.

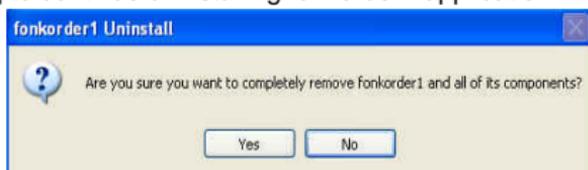

Then all procedures for hardware installing is completely finished, run fonkorder1 application can start any operations what you want.

Section 6. Uninstall Fonkorder1 Application

Click [Start] to [All Program] to [Fonkorder1] folder, select [Uninstall fonkorder1] to remove fonkorder1 application.

Click [Yes] to continue uninstalling fonkorder1 application.

Then will display progress list, after done will pop up below window, click [OK] to confirm and end uninstalling procedures.

Section 7 Connect fonkorder1 Hardware and Application

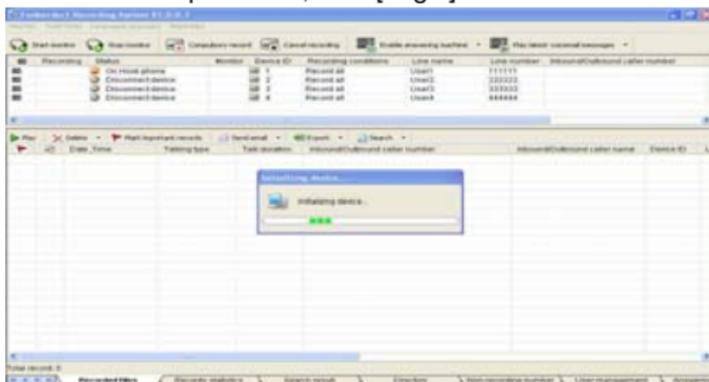

After installed fonkorder1 hardware and application, you can do some simple testing to check whether they are done correctly or not.

Step1. Confirm hardware connecting as per above procedures.

Step 2. Click [Start]\[All Program]\[fonkorder1]\[fonkorder1] to open fonkorder1 application, default username is [Admin], password is [1111].

Step 3. After entered password, click [Login] as shown in below.

Step 4. After login fonkorder1 application, the switch is slide to Line 1 stands Device ID is 1, if the telephone is hang up will show like below, you can pick up phone to check the line status changes.

The screenshot shows the 'Recording System' interface with a table of recording data. The table has the following columns: Recording, Status, Number, Device ID, Recording condition, Line name, Line number, Inbound/Outbound, Inbound/Out, and Talk duration. The data rows are as follows:

Recording	Status	Number	Device ID	Recording condition	Line name	Line number	Inbound/Outbound	Inbound/Out	Talk duration
On Hook phone		1	1	Record all	User1	911111			
Disconnect device		2	2	Record all	User2	222222			
Disconnect device		3	3	Record all	User3	333333			
Disconnect device		4	4	Record all	User4	444444			

Below the table, there is a search and filter section with fields for Date, Time, Talking type, Talk duration, Inbound/Outbound (caller number), Inbound/Outbound (callee name), Device ID, Line name, and Line number. At the bottom, there are navigation tabs: Recorded files, Records statistics, Search result, Directory, Non-recording number, and User management.

Step 5. If you can see the line status changes via operating telephone in different way that stands both hardware and software are done on the right way to go.

Section 8. Login fonkorder1 Application

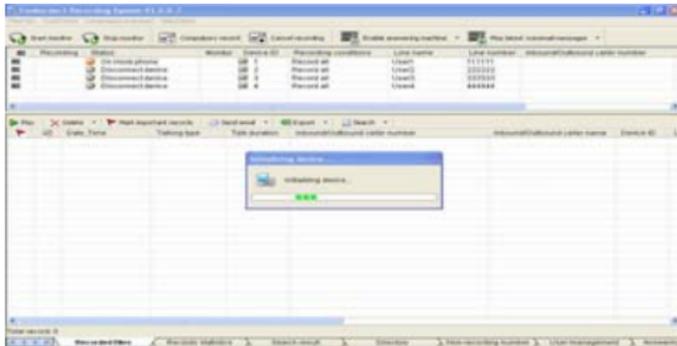

1. Click [Start]\[All Program]\[fonkorder1]\[fonkorder1] to run fonkorder1 application.

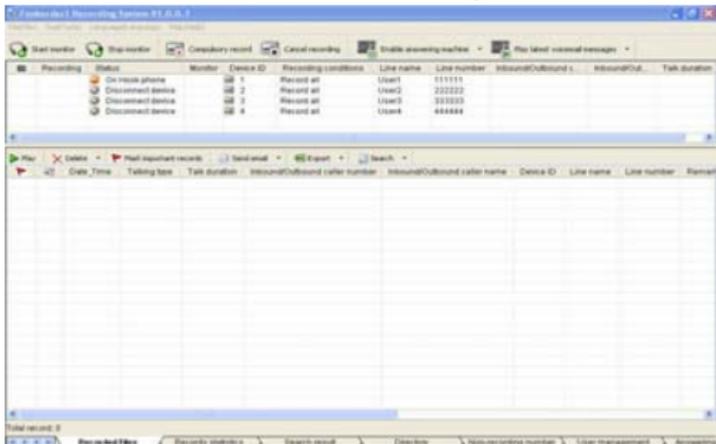

2. Then will pop up login window, key in username and password.
(Default username is: [Admin], password is: [1111])

3. Then click [Login] to login software will display initializing device like as shown in below window.

4. After initializing device will display like below (Only use device ID one is [On Hook Phone] status), and will also display a small icon on right corner stands Fonkorder1 application is running.

Section 9. Logout/Change User on fonkorder1 Application

1. Click fonkorder1 [File] to select [Logout].

2. Then will pop up below window, click [Logout] again to logout application, click [Change user] can login with another user ID, click [cancel] logout operation.

3. After clicked [Logout] will pop up a small icon to remind you system is still running as shown in below picture. (Although system logout already, system still can normal run and record)

4. If you want to login system again, click the small icon of fonkorder1 in right corner will pop up the above login window, then key in username and password can login system again.

Section 10. Exit fonkorder1 Application

1. Click fonkorder1 [File] to select [Exit] to exit application.
2. Or right-click on small icon of fonkorder1 application to select [Exit] can exit fonkorder1 system.

Section 11 Fonkorder1 Application Setting

1. Fonkorder1 System Setting

Application System Setting window

- (1). Click fonkorder1[Tool] to select [System setting].
- (2). After entered will display below window for system setting.

System setting

Run Fonkorder1 Recording System when Windows starts

Auto logout system and minimize window if no operation after time out 1 Minute

Pop Up window on incoming call

Display CDR (call detailed records) within:

Today only Within last three days

Within last one week Within last two week

Within last one month

Recording time less than this time won't be archived 4 Second

Recording time greater than this time will stop recording 0 Hour 0 Minute 0 Second

Clear talk time record after talking 5 Second

Save recording file to this folder:

D:\ Change...

System date time display format MMDD/YYYY / 05/10/2007

Recording archived format:

.wav (Record file with encryption and can only be opened with Fonkorder1 software)

.amr (Record file without encryption play via normal window audio player)

Advanced option

Number of rings before considered *missed calls 5 Second

(2). Auto run fonkorder1 application when windows starts

When select it will automatically run fonkorder1 application when windows starts.

(3). Auto logout fonkorder1 application and minimize window if time out under no any operations

When select it will automatically logout forkorder1 application if time out under no any operations.

Note: After logout fonkorder1 application, system is still running.

(4). Pop up incoming call window

When select it will automatically pop up incoming call window as shown in below picture:

(5). Display CDR within day

This setting can select display CDR within your required day time.

(6). Recording file min time for storage

This setting will decide whether need store the recording as per the scheduled time, if the recording time is less than scheduled time will not store this recording file.
