## **Recording Feature**

Simple to set up and use – the recording feature on a Fanvil X6U and X7 is very clever and makes for an affordable alternative to on demand voice recording.

How to set up recording on your desk phone:

1- Start by plugging in a USB stick to the back of your phone

delivering excellence in communications

2- Under the application settings enable record to local and apply

X7 ==				
	Manage Recording			
> System				NOTE
> Network	Record Setting Enable Record:			Description: Becord Setting, s
> Line		Local		Record Setting, s record config; rec file list
> Phone settings		Apply		
> Phonebook	Recording List			
> Call logs	Index	File Nan	ne File Size	Delete
Function Key				
> Application				
> Security				
> Device Log				

3- Under function keys set one of your "talking" DSS soft keys to record

Function Key Side Key Softkey     System     Network     SoftKey Settings     Soft Disk Key Settings     Very E     Nume     Value     Subtry     Soft Disk Key Settings     Very E     Nume     Value     Subtry     Subtry <th></th>
